Re: Frontend Engineer (Junior Frontend Developer)

Dear Hiring Manager,

As a graduate with a passion for creating and engaging dynamic user experiences, I am excited to apply for the position of junior frontend developer at Sangoma. With proficiency in web development technologies including HTML5, CSS and JavaScript, as well as experience with the framework React.js I am prepared to exceed expectations and contribute to the success of the company

I am a motivated and detailed individual with a passion for learning the latest technologies that are currently used in the industry. I am proficient in web development technologies such as HTML5, CSS, JavaScript, and React.Js. I have hands-on experience in designing, implementing, testing and improving code. I have worked on projects that demonstrate my skills to create responsive and user-friendly applications. For instance, I have developed a website that uses an open-source API and improved its performance using best practices for SEO. In addition, I value communication and teamwork as it is important for the success of the company.

You may notice a gap in my employment while reviewing my resume. During this period, I chose to focus more on studying at George Brown College and improving my frontend skills. The time that I was able to focus on studying has been invaluable to my professional growth, and I am eager to re-enter the professional sphere.

I am excited about the opportunity to join Sangom as a Junior Frontend Developer and contribute my skills to help achieve the goals that the company has. I would welcome the chance to discuss my qualifications further and learn more about the position. Please feel free to contact me at your convenience at englandpelenio17@gmail.com or 647-717-1217. Thank you for your consideration, I look forward to hearing from you in the future.

Sincerely,

Raul England Pelenio
