Telephone	4379703733	
Project Title	Dentistry Web App	
Project Description	<p><u>About the company:</u></p> <p>- This is a private dentistry/clinic with numerous patients and the dentistry has multiple dental procedures that they do.</p> <p><u>About the project:</u></p> <p>- While we were looking through their site, we noticed that the site is lacking some functionalities that would make it run more efficiently. We aim to add different functionalities and try to update the website. We also want to change the design of the site to be more appealing in hopes that new patients will visit the clinic and eventually become regular patients.</p>	
Problem/ Opportunity Assessment *	The current website exhibits an outdated design that does not align with modern user expectations. User interface elements lack responsiveness and fail to provide an intuitive and engaging browsing experience.	
	1. 2. 3.	<p>The new website aims to provide a contemporary and visually appealing design, ensuring an improved and enjoyable user experience.</p> <p>User interface elements will be optimized for intuitiveness, promoting easy navigation and engagement.</p> <p>The project proposes the integration of advanced functionality, including a streamlined appointment scheduling system, comprehensive information architecture, and interactive features to enhance user engagement.</p>
Desired Project Outcomes/ Requirements*		
	1.	For the business more patients mean more revenue that can be generated, the new website will appeal to new patients to visit the clinic.

	2.	This new website will be completely free so the business gets a better site and we have a site that we can add to our portfolio.
	3.	The company must let us have the creative freedom and trust what we believe the consumers will gravitate to.
	4.	Lots of communication between us and the business so that both parties can say what they want and need and have a discussion continuously.
Key Deliverables to be produced by students*		
	1. 2.	Time management, the business will be handling their patients while we have numerous other classes that also have projects that can cause some issues. Scope of project. Will we create both a portal for patients to check their information, a general portal for new patients to book appointments, and a portal for the workers to have access to everything.
Desired Start Date	September 18 th , 2023	
Desired End Date	March 29 th , 2024
